RE: Recommendation for Approval of Cubic Contract Change Order for Additional Spare and Revenue Service Equipment for SFMTA

**Background**

Under Cubic Change Order 126, the TransLink® Contractor will replace the existing SFMTA subway fare collection equipment (faregates) and provide new ticket vending machines (TVM) as part of SFMTA's implementation of the TransLink® system. Both the faregates and TVMs will be implemented as TransLink®-enabled devices that issue and accept a new limited use smart card.

SFMTA requires additional spare modules and revenue service equipment to support the implementation of the new ticket vending machines and faregates at Muni Metro stations. The additional equipment is required to allow for sufficient spares quantities to support the equipment that will become operational starting in August 2010. SFMTA is funding this change through the grant and cooperative agreement between MTC and SFMTA, dated August 24, 2009.

**Recommendation**

MTC recommends that the TMG approve entering into a Change Order with Cubic Transportation Systems in an amount not to exceed \$300,000 for capital expenses. SFMTA is providing separate funding for this Change Order. Consortium funding is not required.
